

AN ELITE INDUSTRIAL PARTNERSHIP

**SPONSORING INTERNATIONAL STUDENTS
AT MINES ParisTech**

With this industrial partnership, be part of MINES ParisTech's international development

As a French company operating worldwide you may be looking for foreign engineers who have been trained in France to ultimately contribute to run your subsidiaries.

At MINES ParisTech we are fully aware of this growing demand. This is why we have strongly developed our international dimension, partly by recruiting foreign students in target countries designated by our partners.

In order to provide you with **French - speaking high-level executive engineers**, we select the best students with a Bachelor's degree from the best universities worldwide and integrate them within our Master Degree in Science & Executive Engineering programme in Paris.

Two years to choose and to be chosen !

Thanks to this programme, you will establish strong links between your company and our students through:

- **Placements** (one per year, lasting at least 3 months). This internship can be specially tailored to your needs
- The student will give the fullest **consideration and priority to any proposal** made by the company after graduation (employment, research placement ...)

A tax - Exempt sponsoring

- **Thanks to the tax rebate, the cost of the programme is only €5,000 per year per student!**

The partner company provides funding for the student's studies and life costs (€25,000 for 2 years). The funding is operated by the School Foundation FI3M which allows a tax rebate of 60% of the sum allocated.

- **This grant covers:**

life costs - tuition & registration fees - health insurance - intensive French language programme

Five reasons to join this programme

- 1** A custom-built and flexible programme
- 2** A strict selection of international students with a high potential...
- 3** ... educated within the top-level training of MINES ParisTech
- 4** A simplified and less costly recruitment process
- 5** Two years to be known by future graduates

The programme schedule

Selection of students by faculty members (exams & interviews)	Autumn N-1
The company interviews the students	January - May N
Sponsoring partnership signed	May - June N
Payment of the annual grant by the company	June N
